DETAILED ACTION

Allowable Subject Matter

1. Claims 1,5-19,21-22,24-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art cited of record, specifically Olbrich et al, although teaching a light source coupled to a contact surface and connected to a circuit board by means of conductors, Olbrich et al does not teach the combination of a panel with at least one graphical image, a light guide mounted for movement relative to the graphical image, a light source mounted to the light guide, a circuit board for controlling the light guide and light source, and specifically, a non contact coupling electrically connecting the light source to the circuit board and a power source coupled to the light guide to move the light guide relative to the graphical image wherein the power source is positioned on an opposite side of the circuit board from the non contact coupling. The method in claim 13 which has the structural limitations of the respective independent claims was not taught by the prior art of record since the prior art does not disclose the steps including coupling the light source to a circuit board with a non-contact electromagnetic coupling.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
